

**Communicate. Collaborate. Automate.**

*Learn how at this IBM hands-on workshop*

Join us for **“Jazz and Rational Team Concert”** hands-on workshop on Tuesday, October 7<sup>th</sup> in Poland (Warsaw, Artistic Centre, Otwocka 14), where we will introduce the first set of offerings built on Jazz technology: **Rational Team Concert.**

Jazz, the exciting new open source technology platform for collaborative software delivery is the platform on which IBM will base their software tools going forward. Rational Team Concert was developed in collaboration with the Jazz.net development community.

**The Rational Team Concert family**, comprising Rational Team Concert Express-C, Express and Standard editions, extends the capabilities of the Team with integrated work item, build, software configuration management (SCM) and the collaborative infrastructure of the Jazz team server.

**The hands-on workshop** will provide the opportunity to get first-hand experience with features including:

- Repeatable structure and process, RUP, Agile, Scrum, your choice...
- Server-based sandboxes
- In context Collaboration: Share queries with team or member
- Work item and change set traceability
- Build definitions for team and private builds
- Transparency: Real-time project status window
- World-class team on-boarding /off-boarding including team membership, sub-teams and project inheritance
- Project initiation in days rather than weeks
- Improved cycle times through automated and reusable patterns, services and architectures
