REST Client

URL: <http://open-services.net/ns/core#default>

Method: GET

Headers:

Name	Value
Accept	application/json

Body:

```

{
  "@context": "http://open-services.net/ns/core#default",
  "type": "Service",
  "name": "Open Services",
  "url": "http://open-services.net/ns/core#default",
  "description": "Open Services is a project to create a common set of services for the Open Services ecosystem."
}

```

Response:

```

{
  "@context": "http://open-services.net/ns/core#default",
  "type": "Service",
  "name": "Open Services",
  "url": "http://open-services.net/ns/core#default",
  "description": "Open Services is a project to create a common set of services for the Open Services ecosystem."
}

```

Response Headers:
